KURUNDA

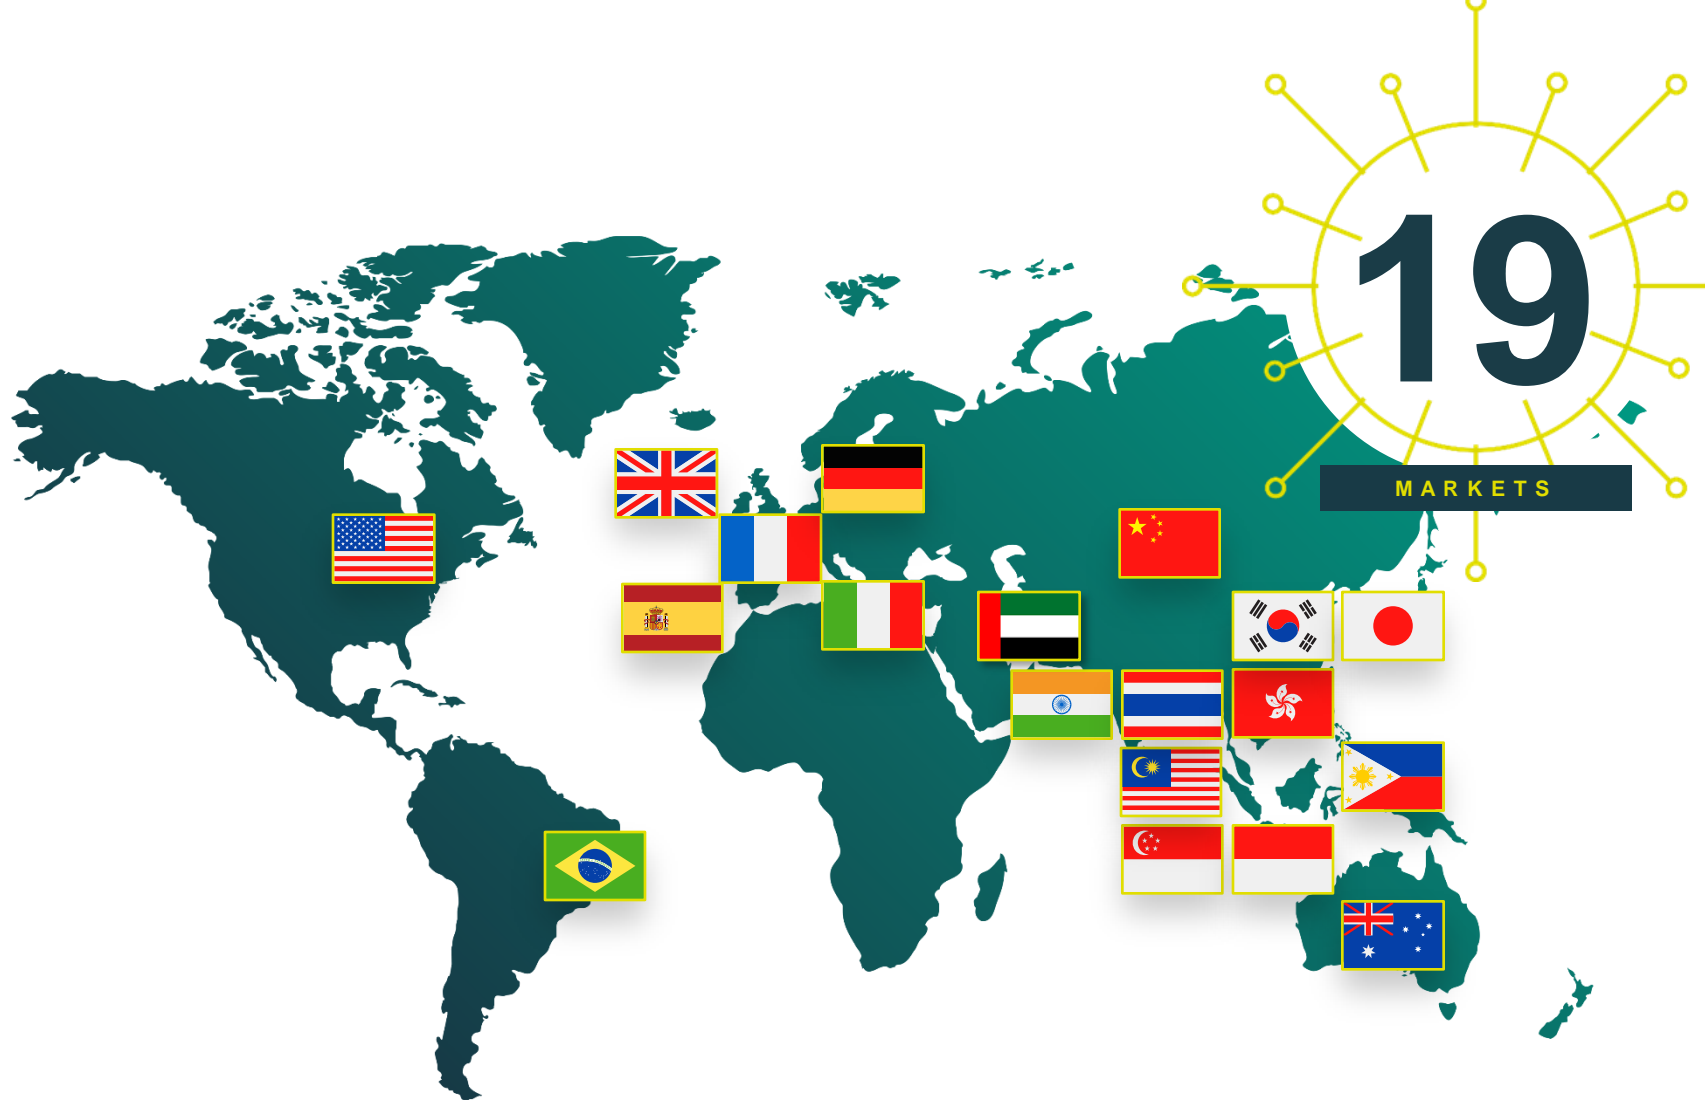

About this study

Together, ITWP companies Toluna, Harris Interactive and KuRunData developed an **ongoing study** to understand the impact that the Coronavirus has on daily life.

The study will be conducted **every 2 weeks** starting on March 31.

This report covers 19 markets.

Findings highlight the importance of consumer insights for brands and businesses as they consider *'The Next Normal.'*

Wave 2: Markets studied and field schedule

Below is the field schedule and number of completed interviews by market included in this wave of research. Data has been weighted by age, gender and region to be Census representative in all markets (except UAE and the Philippines where regions are not weighted, and India where we're Internet representative). In France, data is also weighted to reflect social grade.

	MARKET	COMPLETED INTERVIEWS	FIELDWORK DATES
	UK	1,002	9 th – 14 th April 2020
	France	1,053	9 th – 16 th April 2020
	Germany	1,011	9 th – 14 th April 2020
	Italy	1,253	9 th – 16 th April 2020
	Spain	1,071	9 th – 16 th April 2020

	MARKET	COMPLETED INTERVIEWS	FIELDWORK DATES
	Australia	1,003	9 th – 14 th April 2020
	Singapore	535	9 th – 14 th April 2020
	Malaysia	515	9 th – 16 th April 2020

	Brazil	1,148	9 th – 16 th April 2020

Consumers reactions to the Coronavirus: Europe

Level of satisfaction with life over the past 2 weeks

Satisfaction is highest in the UK and Germany, and lowest (though increasing) in Italy.

Level of concern with different aspects because of the Coronavirus

Concerns seem to be alleviating across Europe, with a notable drop around getting essential supplies in the UK and Spain plus effects on wider society in Italy and the UK.

■ 0 Not at all concerned - 7 ■ 8 - 10 Extremely concerned

Level of support given in response to the Coronavirus outbreak

Support from both domestic and foreign governments is ranked by far the highest in the UK, followed by Germany and Spain. The least support is felt in France.

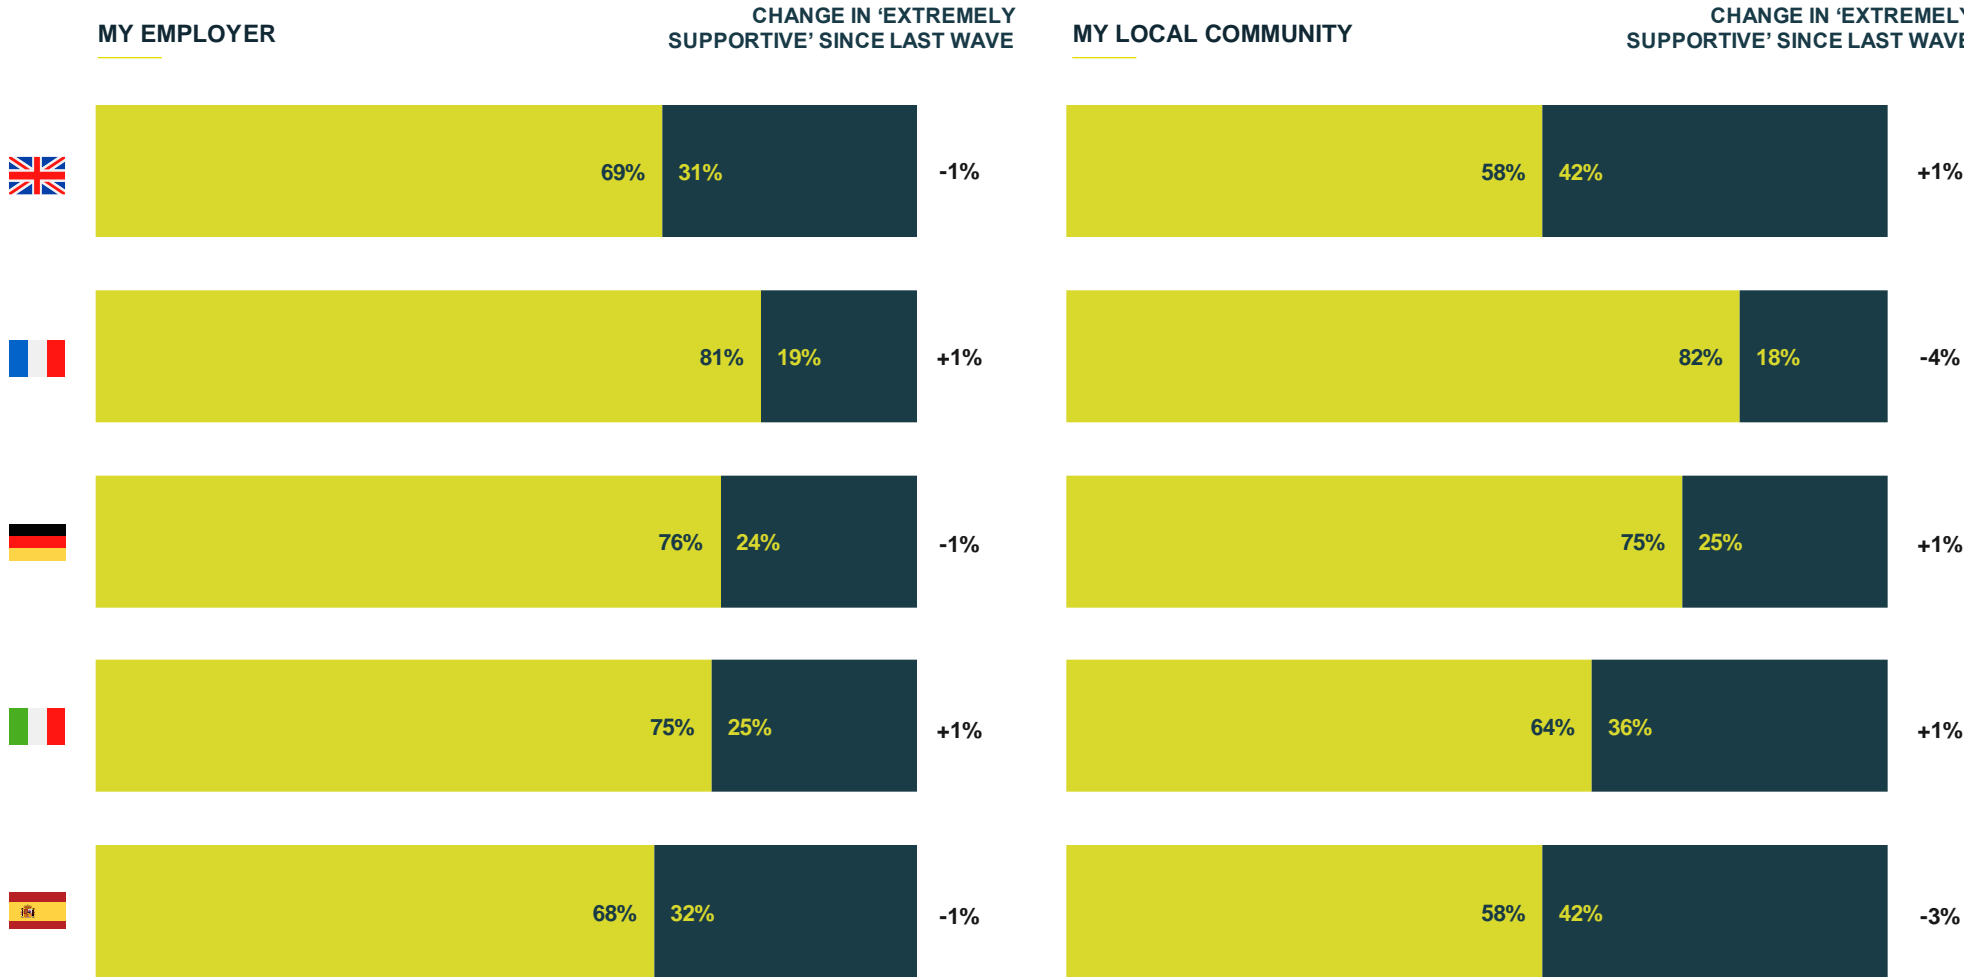

Level of support given in response to the Coronavirus outbreak

Spain is the only country to rank employers more supportive than the government, while in France both receive equally low scores.

EUROPE

■ 0 Not at all supportive - 7 ■ 8 - 10 Extremely supportive

Perceived level of security in employment over the past 2 weeks

Job insecurity has decreased notably in the UK and Germany over the past two weeks, remaining highest in Italy and Spain.

EUROPE

Coronavirus restrictions **knock-on effects**

The UK sees big increases in unhealthy eating and alcohol consumption in the past two weeks, as stress levels drop.

Activities likely to undertake once the Coronavirus crisis is over

The most anticipated actions post-crisis are holidays for Italians and Brits, and more everyday trips out for the French and Spanish.

Lowest scoring country for each measure

Highest scoring country for each measure

Considering changes you have made to your behaviour since the beginning of coronavirus outbreak, how likely are you to make these part of your lifestyle in the future?

The highest levels on intention to incorporate new lifestyle changes are seen in Italy and Spain, where around two in five anticipate this.

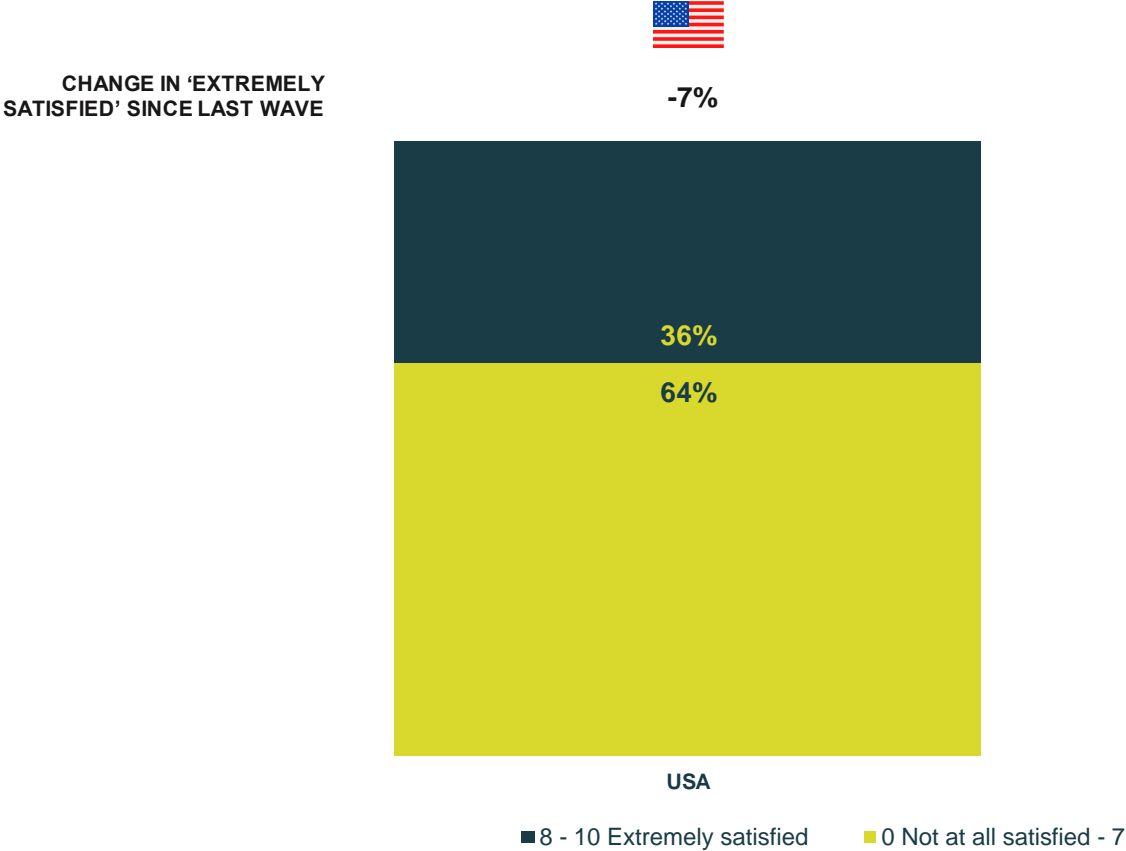

Consumers reactions to the Coronavirus: US

Level of satisfaction with life over the past 2 weeks

Overall satisfaction with life in the US is decreasing, down 7% in the past fortnight

Level of concern with different aspects because of the Coronavirus

Areas of concerns haven't shifted much in the past two weeks, with the majority of Americans saying they're extremely concerned about the effects on wider society.

GETTING ESSENTIAL SUPPLIES

CHANGE IN 'EXTREMELY CONCERNED' SINCE LAST WAVE

GETTING ILL OR CARING FOR ILL DEPENDANT

CHANGE IN 'EXTREMELY CONCERNED' SINCE LAST WAVE

THE EFFECTS ON WIDER SOCIETY

CHANGE IN 'EXTREMELY CONCERNED' SINCE LAST WAVE

Level of support given in response to the Coronavirus outbreak

Over the past two weeks, the local community has taken even more of a lead over domestic and foreign governments and employers in offering individuals support.

Perceived level of **security in employment** over the past 2 weeks

Almost one in three (29%) Americans feel insecure in their employment (including those with reduced or terminated employment).

Difference in % feeling worried, having had
employment reduced or terminated

+2%

USA

- Feel worried
- Have had their employment reduced since the coronavirus
- Have had their employment terminated since the coronavirus

Coronavirus restrictions **knock-on effects**

The biggest behavior changes due to restrictions in the past two weeks are eating less healthily and smoking more, while the overall biggest impact remains feeling more stressed.

*Note – charts are not in proportion to each other by habit

Activities likely to undertake once the Coronavirus crisis is over

There are some increases in the intentions to splurge once the current crisis is over, with well over a third (36%) intending to do more day-to-day outings. Increased health consciousness is the top attitude change Americans anticipate post-crisis.

Considering changes you have made to your behaviour since the beginning of coronavirus outbreak, how likely are you to make these part of your lifestyle in the future?

More than two in five (41%) Americans now rate themselves extremely likely to make their current lifestyle changes permanent, up from just over a third (35%) two weeks ago.

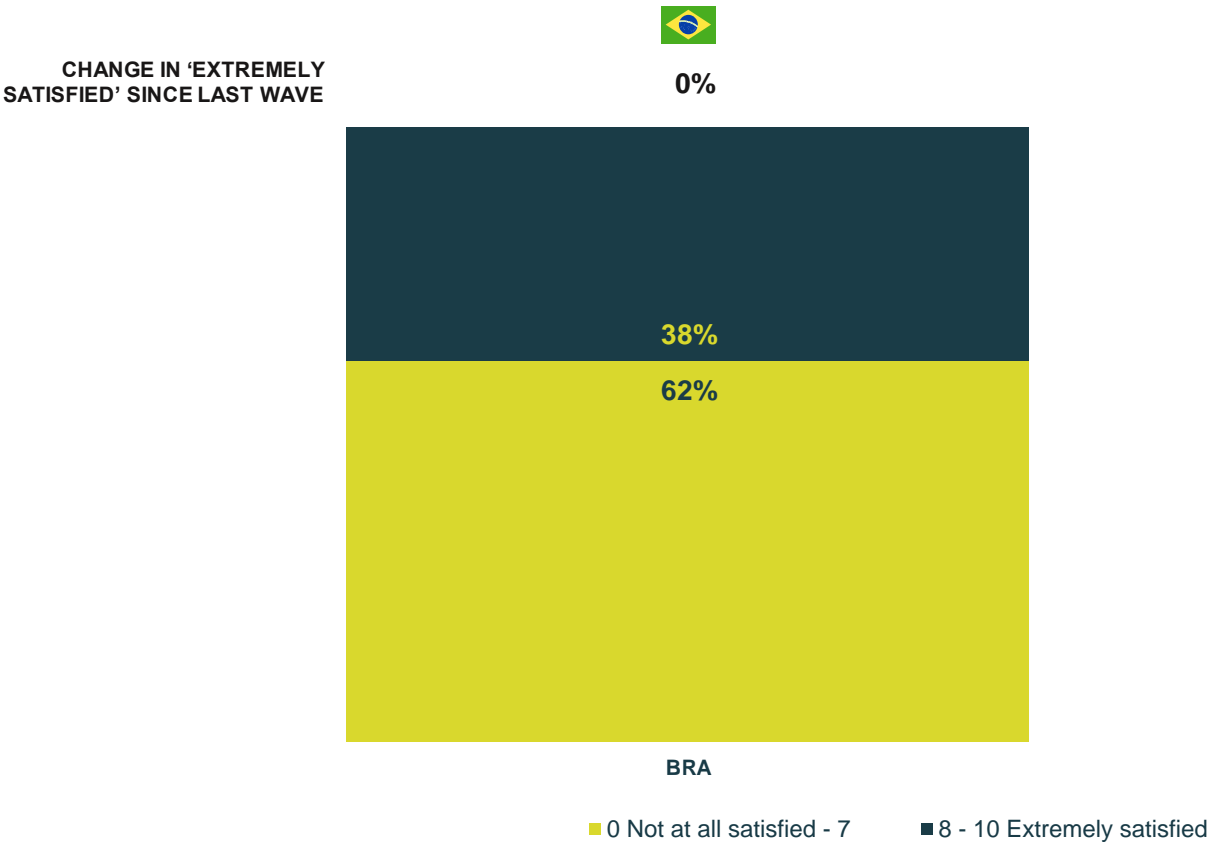

*Some numbers may not total 100% based on rounding

Consumers reactions to the Coronavirus: Brazil

Level of satisfaction with life over the past 2 weeks

Overall satisfaction has stayed consistent in Brazil, with almost two in five (38%) rating themselves as extremely satisfied.

Level of **concern** with different aspects because of the Coronavirus

Getting essential supplies causes relatively little concern for Brazilians, down 5% in the past two weeks.

GETTING ESSENTIAL SUPPLIES

CHANGE IN 'EXTREMELY
CONCERNED' SINCE
LAST WAVE

GETTING ILL OR CARING FOR ILL DEPENDANT

CHANGE IN 'EXTREMELY
CONCERNED' SINCE
LAST WAVE

THE EFFECTS ON WIDER SOCIETY

CHANGE IN 'EXTREMELY
CONCERNED' SINCE
LAST WAVE

Level of support given in response to the Coronavirus outbreak

There has been a notable improvement in support felt from the Brazilian government in the past two weeks, up 9% on the previous rating.

Perceived level of **security in employment** over the past 2 weeks

The total figure for Brazilians feeling insecure in employment (including those who've had their employment reduced or terminated) holds steady at 51%.

Difference in % feeling worried, having had
employment reduced or terminated

-1%

BRA

- Feel worried
- Have had their employment reduced since the coronavirus
- Have had their employment terminated since the coronavirus

Coronavirus restrictions **knock-on effects**

The biggest knock-on effects in Brazil are reduced exercise and increased stress.

*Note – charts are not in proportion to each other by habit

Activities likely to undertake once the Coronavirus crisis is over

There are increases across each of the intentions to splurge post-crisis, with the biggest increase in the intention to take a domestic holiday. The biggest anticipated attitude changes are becoming more health conscious and saving money for future crises.

Considering changes you have made to your behaviour since the beginning of coronavirus outbreak, how likely are you to make these part of your lifestyle in the future?

Nearly half of Brazilians rate themselves as extremely likely to incorporate their temporary behavior changes into their lives going forwards.

*Some numbers may not total 100% based on rounding

Consumers reactions to the Coronavirus: Asia

Level of satisfaction with life over the past 2 weeks

Satisfaction is highest in Indonesia, China and India, but China is the main market where satisfaction is on the increase.

Level of concern with different aspects because of the Coronavirus

Australia sees big declines in concerns around getting the essentials and the effects on wider society, while respondents in Singapore have become much less concerned with personally getting ill or caring for those around them. The highest levels of concern overall are seen in the Philippines and India.

■ 0 Not at all concerned - 7 ■ 8 - 10 Extremely concerned

Level of support given in response to the Coronavirus outbreak

Government support was rated highly in all markets except Japan and Hong Kong.

■ 0 Not at all supportive - 7 ■ 8 - 10 Extremely supportive

Level of support given in response to the Coronavirus outbreak

There have been drops in the support felt from employers in India and from the local community in Singapore and UAE.

■ 0 Not at all supportive - 7 ■ 8 - 10 Extremely supportive

Perceived level of security in employment over the past 2 weeks

The proportion of people feeling insecure or having already had their employment affected by coronavirus is up in UAE, India and the Philippines.

ASIA

Coronavirus restrictions knock-on effects

The Philippines has seen a big lift in unhealthy eating, and Singapore in taking less exercise due to coronavirus restrictions.

Activities likely to undertake once the Coronavirus crisis is over

The biggest desire to splurge after the crisis is over are seen in Hong Kong, Korea and India.

KURUNDATA

Level of concern with essential supplies (including groceries, toiletries and medication) because of the Coronavirus

Concerns seem to be alleviating across Europe, with a notable drop in concern about getting essential supplies in the UK and Spain. Australia, too, sees a notable decline in concern while Hong Kong uniquely sees an uptick.

Level of support given in response to the Coronavirus outbreak

Despite having the highest concerns about accessing essential supplies, those in the UK and Spain are the most likely in Europe to highly rate the support of retailers. Hong Kong continues to rate retailer support low

■ 0 Not at all supportive - 7 ■ 8 - 10 Extremely supportive

Past two weeks purchase of fmcg items

In the UK people continue to shun in-store shopping whilst online grocery shopping sees the highest levels in Europe. China is seeing increases across all three channels of restaurant eating – takeaway, drive-through and in-restaurant eating and drinking.

At least 5% higher than last wave

Has access to the usual products and services been normal over the past 2 weeks?

Access to usual products is up notably in the UK and Australia, but these two markets have some of the lowest scores where over half are now able to shop as normal. Access is declining in India and the Philippines.

Consequences of not being able to access products or services as normal

Going without something usually bought is among the biggest consequences of not being able to access products or services in Europe, the USA and Australia and many people are paying more than usual for products. We see around a third of people globally buying new brands and products.

	EUROPE					THE AMERICAS		ASIA

When you weren't able to access the products and services you would usually buy, how important was the brand in deciding how to seek an alternative?

When faced with limited access, the highest levels of brand loyalty are seen in Indonesia and India, while Japan, the UK and France show the least brand affinity when trying to replace a product they couldn't find.

Willingness to buy a similar product from a different brand if a preferred brand isn't available

Consumers in Hong Kong are less likely to buy a different brand in the same category, whilst increases in willingness to buy another brand is increasing in the UK, the USA, Australia, China and Singapore

Alternatives if not able to get one's preferred product from the usual shopping place

All of the European markets have become more willing to seek an alternative online retailer. The highest levels of willingness to go directly to the product manufacturer are seen in the USA and Thailand.

Blame regarding shortages of products since the outbreak of the coronavirus

Most markets put the blame for product shortages firmly on the shoulders of other shoppers – this is especially the case in the UK and Australia where over 70% of people blame shoppers. Suppliers, brands and retailers tend not to be much less blamed universally.

■ 0 Not at all to blame - 7 ■ 8 - 10 Very much to blame

Are you getting sufficient communications about the impact of coronavirus

People generally feel sufficiently communicated with from both brands and retailers with some improvements seen almost universally

Change over the time spent on choosing what to wear in the past 2 weeks

Universally people are spending less time choosing what to wear than the two weeks before, as lockdown restrictions continue.

Change over the time spent on styling one's hair in the past 2 weeks

People are also spending even less time styling their hair in the past fortnight.

Change over the time spent on **putting on make up** in the past 2 weeks

Similarly for make-up, people are also spending even less time putting on make up in the past couple of weeks.

Interest in environmental issues

Around the world people are admitting to being less concerned over excess packaging in order to have clean products and they also recycle less to keep their homes cleaner. For cleaning products, people are less interested in them being eco-friendly as long as they are effective. Finally, it seems that less choice and supply for those who avoid meat or dairy products is impacting their health and lifestyle choices.

■ ~

- I would usually avoid meat and/or dairy, but if substitutes are not available I'll buy the regular product
- I take less care about recycling if it means my home will be cleaner
- I am less interested in whether chemicals in my cleaning products are environmentally friendly if they can do the job
- I don't mind excess packaging if it means the things I buy are clean

A large, detailed, 3D-rendered virus particle, likely a coronavirus, dominates the right side of the frame. It has a spherical shape covered in numerous small, rounded protrusions (spikes). The background is a soft-focus, light blue-grey field with several other, smaller, out-of-focus virus-like structures. The overall tone is clinical and scientific.

Thank you!
